

Aspen Version Comparison Assistant

Stay competitive by reducing deployment time of new AspenTech software

Aspen Version Comparison Assistant—the first tool in the *Aspen Deployment Assistant* suite—is a powerful utility that helps users validate a new version of AspenTech software quickly and easily (versions 2006.5 or higher). Providing users with a comprehensive report of differences between models in old and new software versions, the tool reduces time required for testing existing models before an upgrade.

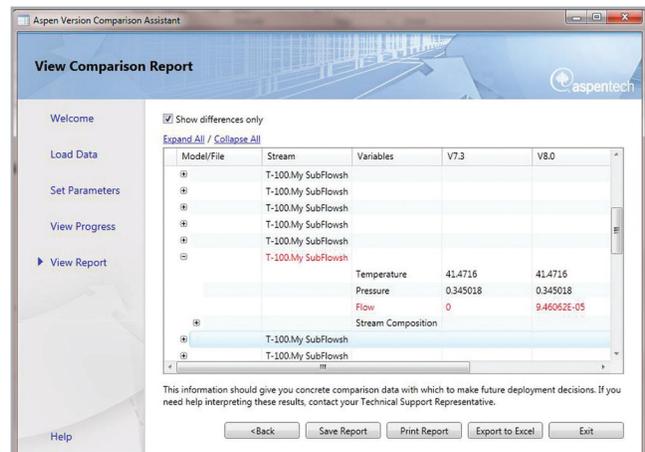

||||||| Get the Latest Software Faster than Ever

Historically, the process of updating to a newer version of software was long and difficult. Different versions of the same software have the potential to yield different results, making upgrading in the middle of a project a risky proposition.

Aspen Version Comparison Assistant allows customers to quickly and reliably validate models in newer versions of *Aspen Plus*[®] and *Aspen HYSYS*[®]. Customers can choose from versions 2006.5 or higher to compare their model results. It is now easier than ever to confidently upgrade software versions without the risk of hindering existing projects. In today's highly competitive market, you don't have a lot of time to spend deciding when to deploy the latest software; with the *Aspen Version Comparison Assistant*, you can do it in minutes.

Why Aspen Version Comparison Assistant

- Quickly evaluate new versions of **Aspen Plus** and **Aspen HYSYS** and determine how they will impact your project
- View a comprehensive report of discrepancies between models run in different software versions
- Facilitate the decision to upgrade to newer software versions and stay competitive

Set tolerances for the key parameters to generate a comparison report that is relevant to your particular project.

|||||| Key Features

- **Easy-to-Use:** Avoid complicated in-house tools. *Aspen Version Comparison Assistant* has an easy-to-follow user interface.
- **Fast:** Use cached results from previous model runs to make comparisons to new versions even faster. What used to take hours or days can now be completed in minutes.
- **Built-in Parameters for Quick Comparison:** Key model parameters are pre-selected to generate a pertinent comparison report. Don't lose time sifting through pages of superfluous data.
- **AspenTech Support:** Get expert help to interpret comparison reports and answer any other questions at <http://support.aspentech.com/>.

|||||| Get It Now

We've made it faster and easier to download the *Aspen Version Comparison Assistant*. Simply go to <http://www.aspentech.com/support-link/v81-version-comparison/>. You must have an AspenTech Support Center account to download the product. If you have any other technical questions or concerns, simply go to <http://support.aspentech.com/>.

|||||| About AspenTech

AspenTech is a leading supplier of software that optimizes process manufacturing—for energy, chemicals, pharmaceuticals, engineering and construction, and other industries that manufacture and produce products from a chemical process. With integrated aspenONE® solutions, process manufacturers can implement best practices for optimizing their engineering, manufacturing, and supply chain operations. As a result, AspenTech customers are better able to increase capacity, improve margins, reduce costs, and become more energy efficient. To see how the world's leading process manufacturers rely on AspenTech to achieve their operational excellence goals, visit www.aspentech.com.
