

aspenONE[®] Exchanger Design Desktop

Now bring the power of Aspen Exchanger Design & Rating products—right to your desktop—in one convenient, cost-effective package!

aspenONE Exchanger Design Desktop bundles industry-leading programs for the design and rating of process heat exchangers—the same software used by the world’s largest process manufacturers—into a more affordable solution for small to medium-sized enterprises (SMEs) on one desktop.

||||||| Easy to Purchase, Easy to Use

You can order this all-inclusive package direct from AspenTech, containing everything you need to deploy the full suite of Aspen Exchanger Design & Rating products on an individual desktop. The single-license bundle includes:

- **Complete access** to thermal modeling and mechanical design products for shell & tube exchangers, air cooled exchangers, plate & frame exchangers, plate-fin exchangers, fired heaters, and more (see full list on other side)
- Ability to **view and use multiple products** concurrently for fast comparison of different scenarios on the desktop
- **Integrated capabilities** with no usage restrictions on the desktop (e.g., integrated thermal and mechanical design of shell & tube exchangers)
- Full access to **product upgrades, patches, and new features** as they become available

||||||| Online Training and Support Built Right In!

In addition to empowering you and your team with the full suite of Aspen Exchanger Design & Rating products, this special package also comes with the following value-add features:

- **Online Training**—Get up to speed quicker with access to animated tutorials and other training materials—right from within the products. Take advantage of all the advanced capabilities of this innovative software in less time.
- **AspenTech Premier Plus Support**—As an AspenTech customer, you’ll have access to our award-winning global technical support, including our robust, content-rich online support center.

||||||| aspenONE Exchanger Design Desktop

Here's the complete list of everything that's included with the aspenONE Exchanger Design Desktop package:

Exchanger Design & Rating (EDR)

- **Aspen Shell & Tube Exchanger** - thermal modeling of shell & tube exchangers
- **Aspen Shell & Tube Mechanical** - mechanical design of shell & tube exchangers
- **Aspen Air Cooled Exchanger** - thermal modeling of air cooled exchangers
- **Aspen Plate Fin Exchanger** - thermal modeling of multi-stream plate-fin exchangers
- **Aspen Fired Heater** - thermal modeling of oil or gas fired heaters
- **Aspen Plate Exchanger** - thermal modeling of plate & frame, or welded plate exchangers

Integration and analysis

- **Aspen Simulation Workbook** - providing integration between MS Excel and Aspen EDR

||||||| Aspen Exchanger Design and Rating

Aspen Exchanger Design and Rating product family offers state-of-the-art heat exchanger simulation and design based on over 40 years of industry-leading research. Our aim is to enhance the value of heat transfer solutions by providing the most integrated product offering across the widest range of technologies. This enables our customers to use the most advanced physically-based modeling, from unit design and overall process design, through to optimization and operational monitoring.

||||||| About AspenTech

AspenTech is a leading supplier of software that optimizes process manufacturing—for energy, chemicals, pharmaceuticals, engineering and construction, and other industries that manufacture and produce products from a chemical process. With integrated aspenONE® solutions, process manufacturers can implement best practices for optimizing their engineering, manufacturing, and supply chain operations. As a result, AspenTech customers are better able to increase capacity, improve margins, reduce costs, and become more energy efficient. To see how the world's leading process manufacturers rely on AspenTech to achieve their operational excellence goals, visit
